AS YOU LIKE IT.

There was one man on the Woodward avenue car the other rainy morning who felt as if the weather couldn't be abused

enough. "Don't you hate such weather as this?" he asked of a portly acquaintance op-

posite. "No, sir," was the decided response "I don't bother about the weather. I it's lair, all right; it it's foul, all right." "But you can't like such a morning as thin 535

"It's just as good for me as any other sort o' morning," was the calm reply.
"And you like to see rain and mad
and slush, do you?"
'Yes, I am perfectly satisfied."
The grumbler was out of patience, but

he secured revenge sooner than he noped for. In getting off the car the fat man slipped and sprawled at full length in the mid, to the intense delight of the other, who rushed to the platform and shouted:
"Don't say a word—it's one of your

kind of mornings! If it was one of my mornings you'd have failen on a bed of

nice, clean, soit white, beautiful snow! Stand up, till I look at you! The lat man stood up. Ho was mud from boots to chin. He looked at himself and tuon at the car, and leebly snin: "I can lick you and all the weather in the country with one hand tied behind

GASLIGHT: ITS EFFECT ON THE EYES.-On the influence of gastight on the eye the following is given from a recent report to the Prussian Minister of Instruc-tion: In general, physicians agree that no evil results will follow the moderate use of gas, and particularly if there are arrangements to prevent the direct action of the veilow fixme on the eye. For this purpose screens or shades are employed. Very grave objection, however, exists, to the use of the zinc or lead shades, most evils affecting the eyes white carelessly handling a pistol yesterday, accidentally exploded it, and is
now suffering from the loss of the little
finger of his left hand.

A little son of John McMahel, was severely burned evening before last by a
little sister running a red-not poker in
his eye. A free application of ice-water
flue simust neared the wound up.

The fair was wall state and headaches result from the
radiated heat. The glass plate below endiated heat. The place plate below the gas, employed in some places, is especially useful for the purpose, as it oauses an equal distribution of the light, necessary where a number are working at one burner, prevents the radiation of the heat, and tends to a steady illumin-ation by shielding the firmt from the currents of air. In cases of highly indamed eyes, dark blue globes can be very beneficially employed. With pre-cautions of this kind no cyll effects from the burning of gas need be feared.

SERMON TO MAMMA,

Declining saties, especially married, are more given, I think, than men, to neglect their personal appearance, when they are conscious that the bloom of

CURIOUS PORTUGUESE FORM OF COURTSHIP. The young men have one occupation boots, and which almost, in fact, goes

with it—that of making the very mitdest form of love known among men. The process, indeed, is carried on in or Piatonic a manner, and with so much proper leeling, that I doubt that If even the strictest English giverness would find anything in it to object to. The young gentlemes pay their ad-
